DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, drawn to a nanoparticle, classified in class 525, subclass 332.9.
 - II. Claims 10-17, drawn to a process for forming nanoparticles, classified in class 526, subclass 89.
 - III. Claims 18-23, drawn to a rubber composition, classified in class 523, subclass 201.

The inventions are distinct, each from the other because:

2. Inventions I and II are related as product and process of making the product. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the nanoparticles can be prepared by emulsion polymerization (see page 6, line 12 of instant specification).
3. Inventions (I or II) and III are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product, and the species are patentably distinct (MPEP § 806.05(j)). In the instant case, the intermediate product is deemed to be useful as an adhesive and the inventions are deemed patentably distinct because there is nothing on this record to show them to be obvious variants. Note that the nanoparticle is transformed when incorporated into the rubber composition given that the functional groups associate with the rubber and filler.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Meredith Hooker on 1/2/2007 to request an oral election to the above restriction requirement, but did not result in an election being made.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
